

Christmas ornaments with Flowerribbons

Materials

- Kraft paper, gold cardboard
- Eline's Winterhouse 'Let it snow' paperbloc PB7037
- Craftable Heart CR1225, Star CR1226 and Tree CR1227
- Christmas berries gold JU0858
- Christmas texts Creatables Dutch LRO222 and English LRO225
- Flowerribbons Off-White FR1111, Beige FR1115 or Darkred FR1121
- Vintage Lace dark JU0843 or Linen Rope JU0851
- Scissor, double-sided tape, glue

Method

- 1 Cut out the biggest forms of the Craftables out of kraft paper.
- 2 Cut out shapes with the middle size of the Craftables dies two times of paper from the Paper bloc.
- 3 Glue the design paper forms on both sides of the kraft paper form.
- 4 Cut Flowerribbons in loose flowers and pull out the berries from their base. Make sure you keep the stalks on the berries.
- 5 Put a few pieces of double-sided tape on the front side of the ornament. You can use this to make a composition of the Flowerribbon flowers and the berries. The double-sided tape ensures that the berries will stay put while you stick everything together.
- 6 Start attaching the flowers one by one to the ornament with some glue. Put a good layer of glue everywhere so that everything is stuck well together.
- 7 Cut out of gold cardboard the Christmas texts and the ice crystals of the Craftables.
- 8 Glue the ice crystal on the back of your ornament.
- 9 Glue the Christmas text and press it firmly onto the flowers so that it adheres to the Flowerribbons well enough.
- 10 Cut a piece of lace or rope and attach it with a staple at the top of the ornaments.

The Christmas ornaments are ready! You can endlessly vary with paper, colours and ribbons. Hang them in your Christmas tree, on a Christmas wreath or garland or hang them in a branch at the window for a more rural look!
